

The Teachers Lounge: Place Value and Division (Paperback)

By Catherine Twomey Fosnot, Chris Natale

Heinemann USA, United States, 2008. Paperback. Book Condition: New. 272 x 216 mm. Language: English . Brand New Book. The Teachers Lounge: Place Value and Division is one of five units in the Contexts for Learning Mathematics Investigating Multiplication and Division (3 - 5) The focus of this unit is division. It begins with the story of a teacher noticing a service person in the teachers lounge fill two different vending machines with beverages. In the first machine, there are bottles of water only. The machine holds 156 bottles of water when full and the teacher wonders how many six-packs that might be. The second problem involves the juice machine. It also holds 156 bottles when full, but the bottles are partitioned into six columns because there are six different flavors of juice. The teacher wonders how many there are of each flavor. Although most students do not realize it at the start, the two problems are related. The first problem is a quotative division situation - the amount in each group is known, the number of groups is not. The second problem is a partitive division situation - the number of groups is known, the amount in each group...
